

## Project Status report

Name: Bhargav Taraviya, Trupalkumar Ukani

Community & UN SDG(s):  
- SDG 15: Life on Land - Combat deforestation and protect terrestrial ecosystems.  
- SDG 13: Climate Action

Sprint cycle dates: \_\_\_\_\_

|                    |   |
|--------------------|---|
| Project Name       | Deforestation Data Platform   |
| Blurb              | The Deforestation Data Platform is an interactive Power BI dashboard that visualizes global deforestation trends using publicly available datasets. The platform provides users with real-time insights into deforestation patterns, regional comparisons, and deforestation drivers. The goal is to make deforestation data accessible, understandable, and actionable for policymakers, researchers, and students. The project aligns with UN SDG 15, focusing on sustainable forest management and conservation efforts. |
| For Week Ending    | 24 <sup>th</sup> March 2025   |
| Project Status     | Green   |

### Activities—During the past sprint cycle

#### Trupal:

- Further progressed in Project Paper
- Designs Review and Testing

#### Bhargav:

- Power BI Report Design, visuals for different pages
- Implementation new page, explored and tested different ideas
- Causes of Deforestation further explanation integrated into report.

### Project Issues

- No issues as of now.

### Project Changes

There is no change.

### Activities—Planned for Next Week

- Complete Reference page

- 
- Final Testing

## Reflection

- Yes, we feel we are on track.

What progress do you particularly feel good about?

- Most achievable work is implementing remaining pages in our report.

What barriers (if any) do you feel is/are a current impediment to success?

- Ensuring data accuracy and validation.

What questions or concerns do you have (if any)?

- No questions.
