

Project Status report

Name: Bhargav Taraviya, Trupalkumar Ukani

Community & UN SDG(s):

- SDG 15: Life on Land - Combat deforestation and protect terrestrial ecosystems.
- SDG 13: Climate Action

Sprint cycle dates:

Project Name	Deforestation Data Platform
Blurb	The Deforestation Data Platform is an interactive Power BI dashboard that visualizes global deforestation trends using publicly available datasets. The platform provides users with real-time insights into deforestation patterns, regional comparisons, and deforestation drivers. The goal is to make deforestation data accessible, understandable, and actionable for policymakers, researchers, and students. The project aligns with UN SDG 15, focusing on sustainable forest management and conservation efforts.
For Week Ending	07 th April, 2025
Project Status	Green
Status Description	Complete: Remaining pages and testing of our dashboard. In Progress: None. Planning: None.

Activities—During the past sprint cycle

Trupal:

- Design Review and Testing
- Finished writing Project Paper

Bhargav:

- Implementation of References and Learning Page.
- Final Testing.

Project Issues

- No issues as of now.

Project Changes

There is no change.

Activities—Planned for Next Week

- None

Reflection

- Yes, we feel we are on track.

What progress do you particularly feel good about?

- Most achievable work is finishing the overall design and publishing our report.

What barriers (if any) do you feel is/are a current impediment to success?

- Data accuracy and ease of navigation.

What questions or concerns do you have (if any)?

- No questions.
